**ANTIDECUBITAL MATTRESS
 TO THE BED XENA**

V042ENC

-  840 x 1 900

Folding bed was developed for solving crisis situations in floods and other natural disasters. Folding bed allows for flexible adaptation evacuation plans inpatient medical and social facilities. Folding bed enables quick location of bedridden patients and clients to easily manipulate a mobile bed in the other unaffected objects. The bed has a mattress with the possibility of anti-decubitus and removable bracket for the implementation of the infusion.

The proposed design of the bed allows easy handling by means of trolley wheels and then fast full-featured use. The loading area allows comfortable sleeping at a high level, ensuring a high quality anti-decubitus mattress. Storage beds are very simple, space-saving, with practical packaging.
